

Furkan Çiloğlu

Thanks to the courses I took from Istanbul Informatics Education Center and Udemy , I stepped into industry software. I have had the opportunity to work in various projects since February 2022. I developed with React.js, JavaScript, Asp.net, sql and .NetCore. Besides these programming languages I use, I used html,css Bootstrap, tailwindcss . When I needed to use different languages within the project, I came to the conclusion by doing the necessary research.

EDUCATION INFORMATION

2016

Gazi University

Faculty of Civil Engineering

2022-continues

Andolu Univesity Open Education Faculty

Computer Programming

WORK EXPERIENCES

01.02.2022-01.11.2022

Fanus Media

Software Developer

I had the opportunity to develop more than 30 projects for local companies using react.js and redux.

01.02.2023-Continues

Loscart

Software Developer

I took part in the development of the company's active website with React.js and TypeScript. Integration of artificial intelligence supported chatbox into related sites.
